Hand Washing
– The best defense against any virus is a 20-second washing of your hands with soap and warm water. An interesting fact – washing in colder water and soap for 20 seconds is the most effective way to kill germs. Use hand sanitizer when you can’t wash your hands.

Physical Distancing
– While waiting to enter a building, or inside a building, follow the signs on the floor to assist you with distancing yourself from others by at least 6 feet. When in doubt, you can always add the “two arms’ length rule” between you and the next person. Where seating inside the dining centers is available, carefully read the signs regarding traffic flow and how you should request and receive your meal.

Masks
– Consistent with the current Massachusetts mandate to wear face masks in public places, indoors or outdoors, you must now be wearing a covering to enter any Tufts Dining location.

Sanitizing Stations
– While washing your hands with soap in warm water is best to avoid germs, it’s not always possible. Disinfecting hand sanitizer is available at each location. In fact, do this before you go near your meal. Set it aside and sanitize before handling your food.
